

SIRIUS

PROJECTS

SHINING MOMENTS

OUR STORY

“ **Every year we transform companies, cities and festivals into magical spaces.** ”

Founded by Stig Gerlach, SIRIUS has been around since 1971. Back in 1988, Stig Gerlach, current CEO, chose to focus on lighting designs. Ever since, SIRIUS has grown into a leading expert in the area with over 30 years of experience, where we now stand as a strong and innovative brand.

Being a leading company in creation of unique installations of light designs across Europe, we have for mission to deliver quality products. We guarantee shining moments all year around by creating unique and customer focused experiences.

Our strategy revolves around innovative technology, unique designs and high quality, to evoke an emotion and atmosphere. Every year we transform companies, cities and festivals into magical spaces.

We have a big number of projects running all year round. To name a few in Denmark, we have on-going collaborations with Salling, Århus Municipality, Hotel D'Angleterre and Musik I Lejet.

An extended office in Hong Kong, 3000 customers worldwide, sales organisations in 20 countries, a total of 13,000 europallet capacity in both our warehouses combined, and remain financially strong with an AAA rating.

Let us consult you on your next project, and guide you through our light options. We can provide you with everything from traditional light chains, to creative light installations customised to your needs and preferences. Our expert team is here to help, collaborate and innovate your project to completion.

SIRIUS
SHINING MOMENTS

LEARN MORE

SCANDINAVIAN INSPIRED

A “HYGGE” LIFESTYLE

The Scandinavian countries get so little natural light during the winter months, therefore lighting has become a huge part of their designs. The homes are designed to maximise natural light and decorated to create a comfortable interior thanks to warm, dim lighting.

The notorious “Hygge” concept is not tangible nor visible, it is experienced. It is a feeling of comfort and conviviality. A feeling of happiness and well-being. Created through an atmosphere, hygge is the pillar of Danish culture.

This concept is a lifestyle, and extends from a warm evening at home to a cozy evening stroll. Our endeavor at SIRIUS, is to evoke this feeling all year around, indoor like outdoor. We embrace darkness as we brighten up any winter or summer evenings with captivating light installations.

ÅRHUS
STREET ILLUMINATION

CSR APPROACH

ENVIRONMENTAL ASPECTS

We work towards the UN sustainable development goals, and base our approach on the following 3 pillars of sustainability:

SOLAR ENERGY PRODUCTS

Our collection offers a range of LED solar products. Every year we work to develop this innovation further for the line to extend.

GREEN ENERGY

A wide range of our products are labeled with our registered trademark GREEN ENERGY. These products save up to 90% of electricity, in comparison to traditional ligh decorations.

RESPONSIBLE LIGHT/ENERGY USE

Our Danish office is designed and optimised for energy saving and light consumption. Lights turn off automatically and a modern heating and cooling system runs the building to save on energy usage.

CARBON FOOTPRINT

We aim to reduce our carbon footprint throughout our entire supply chain. We avoid moving our products with air transport and our forklift trucks are powered electronically. The distribution company we collaborate with ensures to use their vehicles efficiently and minimise CO₂ emissions.

RECYCLING MATERIALS

We strive to use reusable and recyclable materials. Our packaging are made of carton and our logistics department sort wastes out responsibly in respective collection centers.

PROJECT STANDARDS

QUALITY FROM CONCEPT TO COMPLETION

FRAME QUALITY

ALUMINUM

Light decorations are professionally made from aluminum, to remain strong and imperviable to corrosion over the years. From project conceptualisation to completion, we promise the best solutions designed for your specific needs.

CONNECTORS

AIRTIGHT

Using quality connectors is of high importance, especially for outdoor projects, where the light installations are naturally more vulnerable and prone to contact with water. Strong connectors will prevent this contact.

UV-LIGHT RESISTANCE

RUBBER CABLES

Rubber will boost the quality and lifespan of your project, by protecting the cables from the sun's UV-light. It also has a higher resistance to rougher weather, such as freezing temperatures.

COPENHAGEN

MAGASIN STARRY WALL

LET'S WORK TOGETHER

FROM CONCEPT TO COMPLETION

BRIEF

Creation of the project brief, including your requirements, wishes, needs and estimate budget.

SUGGESTIONS

MAGASIN STARRY WATERFALL

OUR LIGHT SYSTEMS

DIFFERENCE BETWEEN OUR START AND SUPPLEMENT SETS

Our light systems are designed for simple project building.

START SETS

As indicated in the name, a start set will start your succession of light chains.

The start sets come with a plug to connect to a socket.

Start sets are essentially supplement sets attached to a power cord.

SUPPLEMENT SETS

As indicated in the name, supplement sets are supplements to your start set or power cord.

A supplement set alone will need a start set or power cord to turn on.

Supplement sets can be connected in succession, one after the other, to form your desired look.

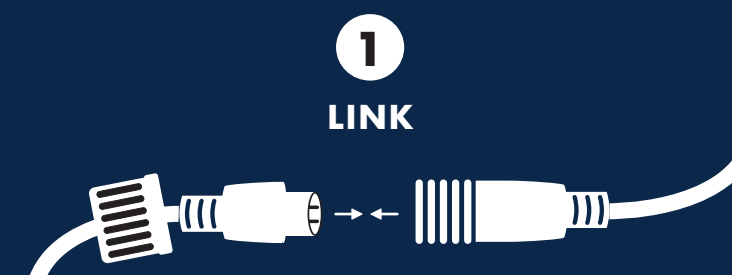

NOTE

All start sets have a maximum of LEDs that can be connected in succession.

QUICK LINK

QUICK AND EASY CONNECTION

Our connectors are designed to accelerate the installation process of your project through a quick and easy use system.

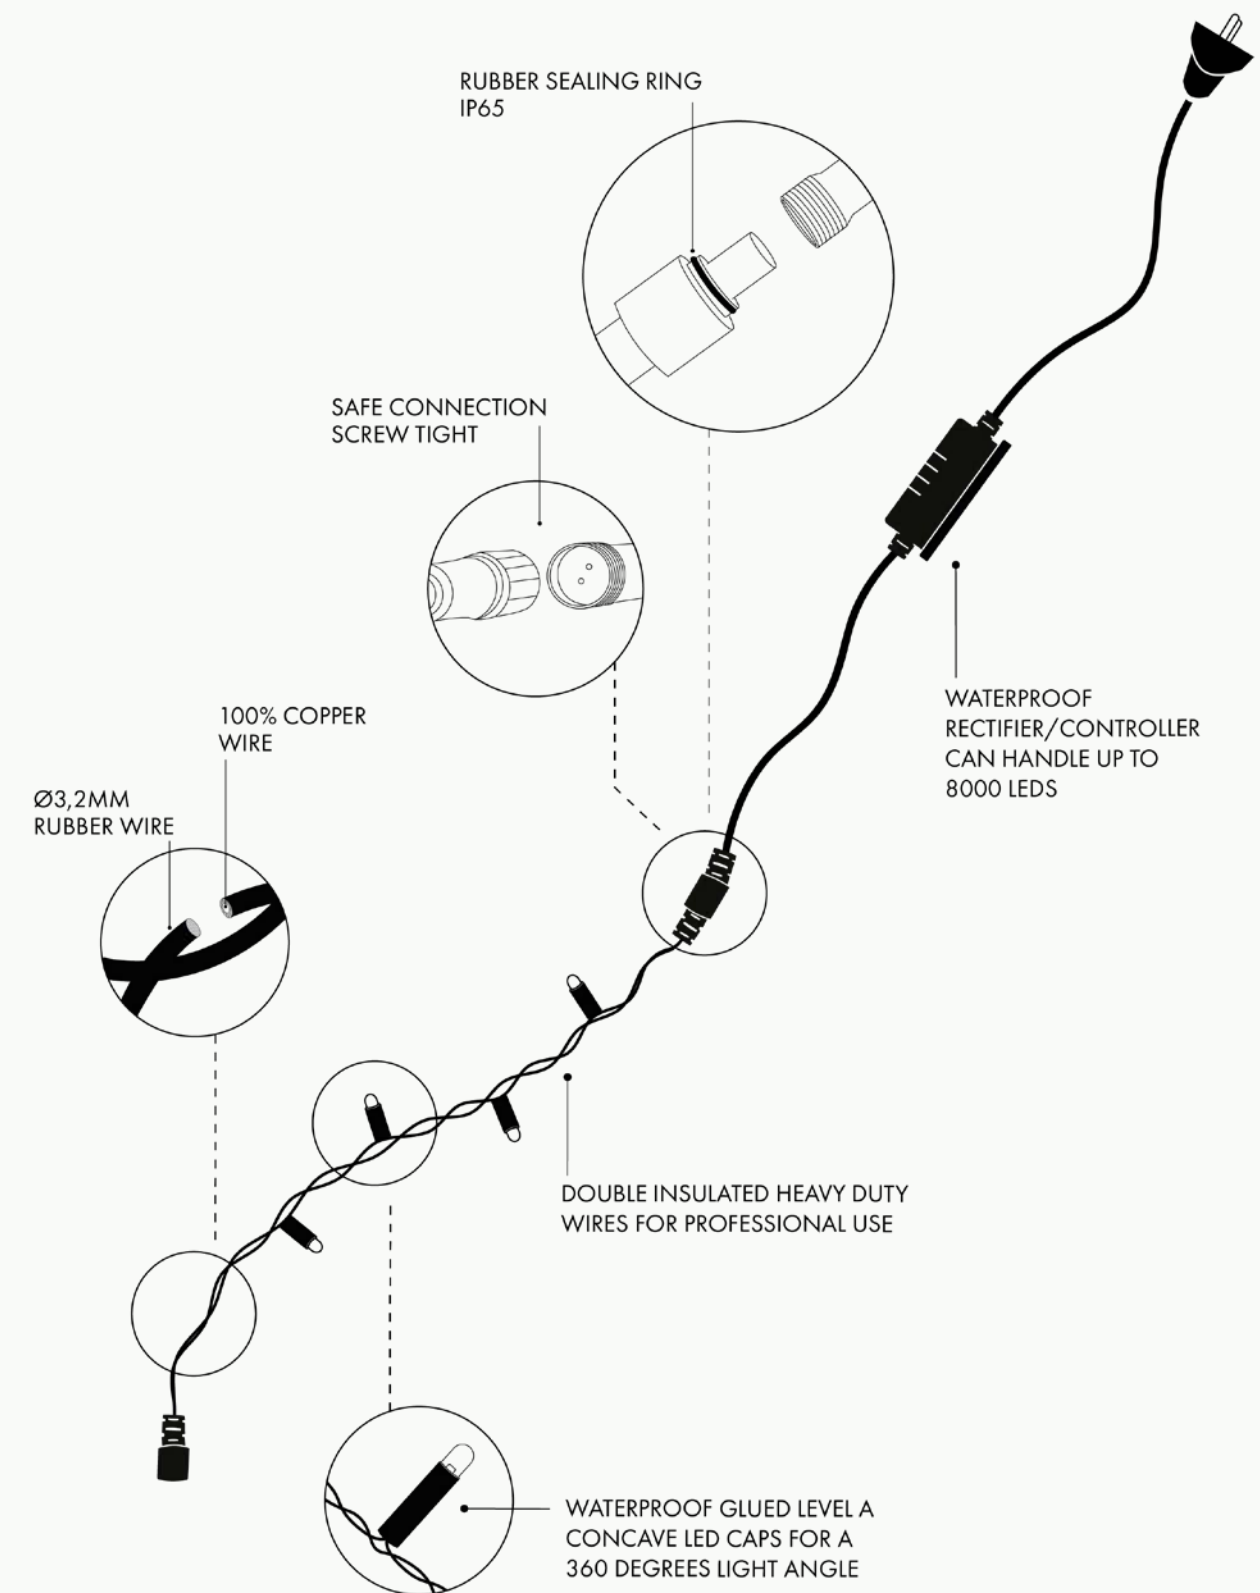

PROFF-LINE

SPECIFICATIONS OF THE WIRE AND BULB

We always suggest PROFF-LINE for big outdoor projects. The product is sturdy and made to withstand any type of weather, whether you live in a rough windy cold area or a warm and humid one.

PROFF-LINE

HIGH VOLT
230V

MAX. 8000 LEDS
PER SOCKET

IP65
WATER RESISTANT

CABLE MATERIAL
RUBBER

We always suggest PROFF-LINE for large outdoor projects. The product is sturdy and made to withstand any type of weather, whether you live in a climate that is rough, windy and cold or a warm and humid one. The 230V extendable system can connect up to 8000 LEDs.

PROFF-LINE

TECH-LINE

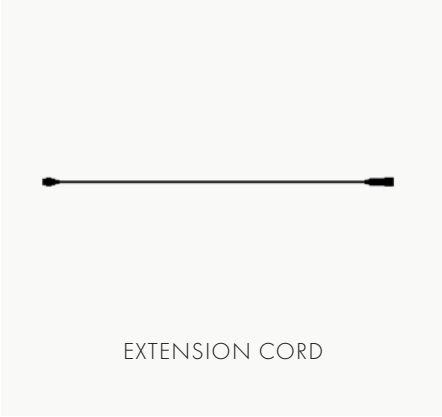

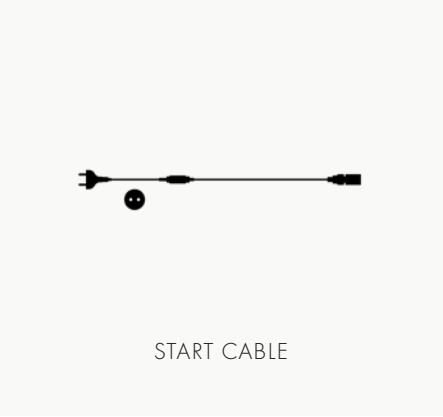

PROFF-LINE UPGRADE

Our new PROFF-LINE is now connectible with TECH-LINE.

ÅRHUS

STARRY NIGHT

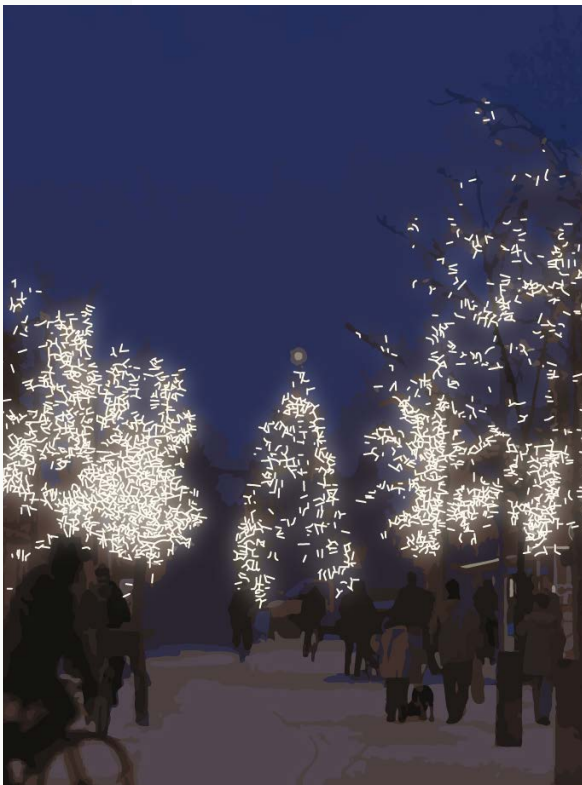

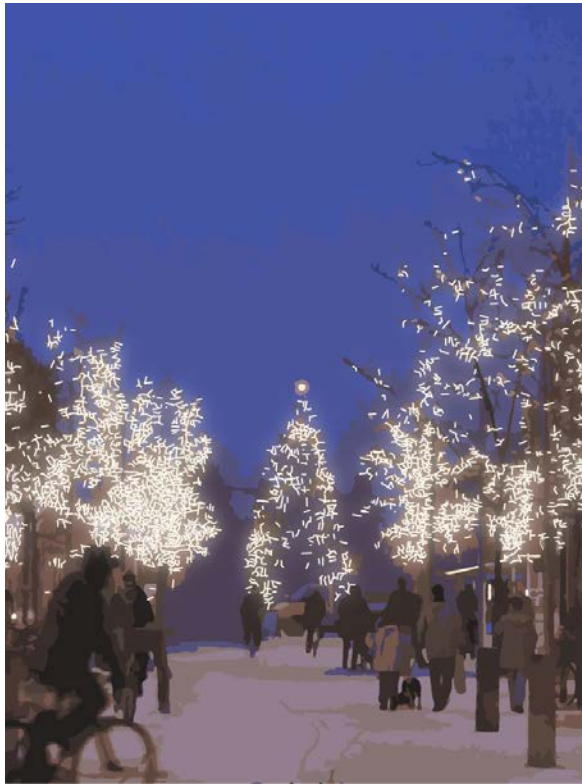

The cold dark days were near, and Århus wished to bring a little more joy to the people of the city. SIRIUS covered the streets in a starry night sky and turned the city into one magical shining moment.

ALLERØD

MADSENSVEJ

The SIRIUS headquarters is located in Allerød. Madsensvej is Allerød’s main street, leading to the train station. Holiday shopping is always more fun when the Christmas spirit is in the air, so the lane was transformed into a magic pathway to the Christmas tree.

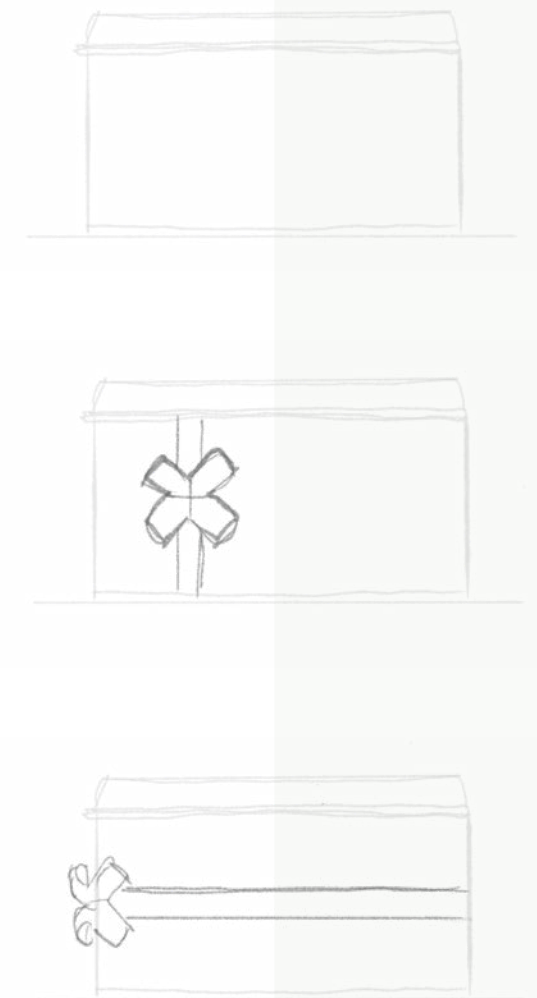

ÅRHUS

SALLING

Salling is an iconic shopping center in Denmark. For the Christmas season, Århus wanted to give the people a better shopping experience by decorating the building facade into a big installation. The passersby could enjoy Salling's gift to them while shopping for their own Christmas presents.

The 230V extendable system TECH-LINE can connect up to 8000 LEDs, without the need of a transformer.

COPENHAGEN

HÔTEL D'ANGLETERRE

A popular attraction in Copenhagen is Hôtel d'Angleterre's annual illumination. A big crowd gathers every year to witness the moment and enjoy the long awaited Christmas atmosphere the decoration reflects.

Hôtel d'Angleterre wanted an installation representing cosiness, elegance and warmth. The decision was quickly established on this substantial and wealthy curtains. The magical lights drape down the beautiful facade, revealing the rest of the installation.

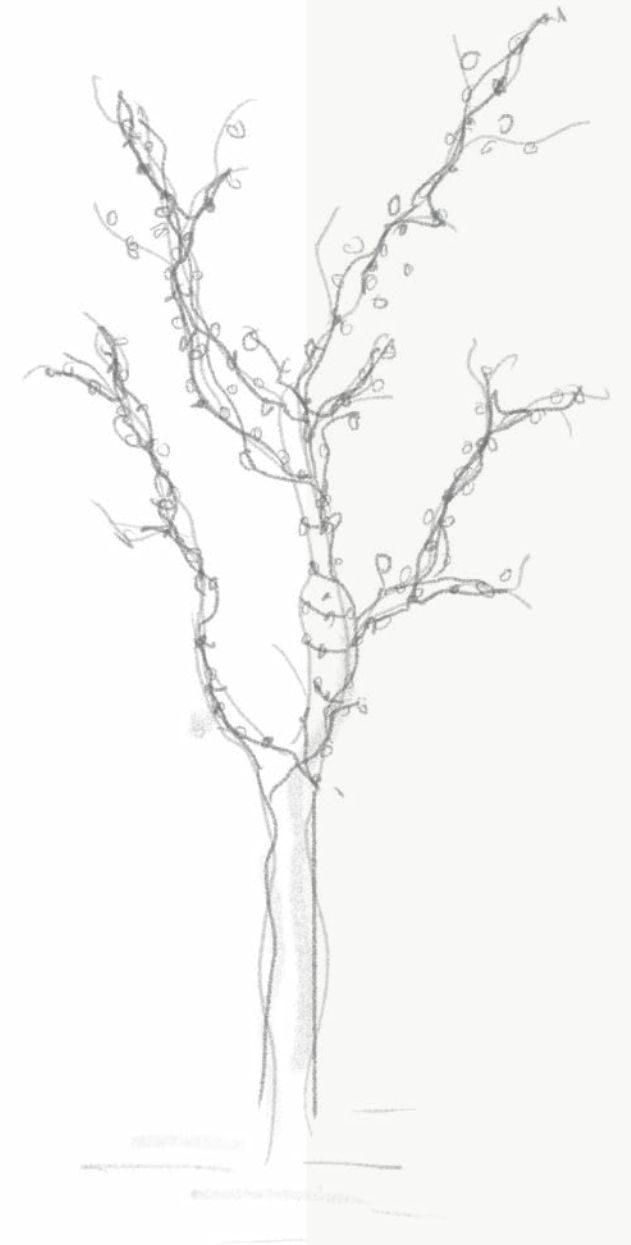

BALLERUP

TRYG

Tryg, an insurance company in Ballerup, decorated their street with lights during the dark winter days. This was to offer warmth and security to the passersby.

TOP-LINE

The extendable system TOP-LINE can connect up to 2000 LEDs and is powered by a light weight electronical transformer. The strong cables and connectors are made to withstand Northern Europe’s rough winter weather.

HELLERUP

TUBORG HAVNEPARK

SIRIUS decorated an entire street of buildings in Hellerup, to brighten up the evenings.

EGESKOV SLOT

HEARTLAND FESTIVAL

Heartland is a popular Danish festival rich of culture. From talks to contemporary art, the guests can immerse themselves with live music accompanied by a delicious food scene.

Heartland’s mission is to bring people together through forming communities and entertaining experiences. The festival is hosted around the stunning surroundings of the Egerskov castle, on the island of Fyn, Denmark. To top this with more magic, SIRIUS decided to sponsor the festival with light decorations across the entire area.
